Re: Ex Parte Presentation in WT Docket No. 02-146

Dear Ms. Dortch

Yesterday, on behalf of Cisco Systems, Inc., Scott Harris and I met with Ed Thomas, Julie Knapp, Fred Thomas, Jim Schlichting, Mike Marcus, and Scot Stone of OET to discuss Cisco's views on the future of the 71-76 and 81-86 GHz bands. We reiterated the views Cisco has already expressed in written comments in Docket No. 02-146, including Cisco's view that commercial links in the 70/80 GHz band must receive full interference protection. We also discussed ways in which the needs of government users of these frequencies can be accommodated within a commercially viable framework for the authorization and deployment of new non-government links without excessive cost or delay.

Please direct any questions about this matter to the undersigned.

Respectfully submitted,

/s/Mark A. Grannis
